JNANA TEJA CHINTA

Full Stack Developer

✉ chintajnanateja@gmail.com | ☎ +91 7893163197 | linkedin.com/in/jnanateja

Summary

Full Stack Developer with hands-on experience in building scalable web applications using **Angular, Node.js, and MySQL**. Proven ability to design, develop, and integrate **RESTful APIs**, ensuring efficient data flow, high performance, and maintainable application architecture.

Experience

Full Stack Developer

Sri Heramba Innovations Pvt Ltd May 2025 – Present

- Built and maintained a **School Management System** using **Angular, Node.js, and MySQL**, delivering end-to-end features with efficient data handling and scalable architecture.
- Developed and integrated **RESTful APIs** to connect the Angular front end with Node.js back end, ensuring smooth data exchange and synchronized application workflows.
- Designed and optimized **MySQL databases**, improving query performance and ensuring reliable, scalable data storage for core system functionalities.
- Created a **self-service Reports Module** enabling organization owners to generate real-time reports via UI-based dropdowns without SQL queries, reducing report generation time by **90%** and removing the dependency on administrators.
- Developed an **Attendance Module**, reducing manual tracking efforts by **60–70%** while ensuring accurate, real-time synchronization across multiple user roles.
- Integrated AI-driven question generation in an LMS using **LLaMA 3.1 (8B) via Groq Cloud APIs**, enabling fast, low-latency quiz and exam creation and reducing manual question creation time by **80%**.
- Implemented cumulative exam and progress report generation by combining multiple assessment components with predefined weightages, ensuring accurate calculations and real-time report availability.

Projects

Title : Expense Tracking System

Technologies Used: Angular, HTML, Bootstrap, CSS, Node.js, Express.js, MySQL

- Developed a **dynamic real-time dashboard** to visualize credit and debit transactions, providing users with clear insights into expenses, income, and savings.
- Implemented a **simple transaction entry flow** where users add item details, select credit or debit, and enter the amount, with all calculations handled automatically.
- Built automated logic to **calculate total expenses, income, and savings**, helping users track their financial status without manual calculations.
- Designed expense categorization and analytics to **identify high-spending areas**, enabling users to understand where money is being spent the most and how savings can be improved.
- Applied **machine learning regression** to analyze spending patterns and generate an **expense health score**, which indicates financial stability.
- Configured **alerts and notifications** to warn users when the expense score drops below a defined threshold, encouraging better financial decisions.

Skills

Web Development: Angular, HTML, Bootstrap, CSS, Node.js, Express.js
Programming: Python
Database: MySQL
Version Control: Git, Github

Education

Bachelor of Science in Computer Science

Maharaj Vijayaram Gajapathi Raj College of Engineering Graduated: 2024
CGPA: 7.08

Languages

English, Telugu
